DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to plug and abandon this well by putting a plug on bottom with 35 bags of cement displaced with 19 barrels of mud. This should fill up 113 feet. Pull up in surface pipe & set a plug with 10 bags of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
