DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose drilling to 6000' or the top of Morrison or prior production; will set 13 3/8" casing at top of Farmington sand (Est - 700'), 10" casing at top of Pictured Cliff (Est - 1400'), 8" casing at top of Mesa Verde (Est - 3600'), 5" to Dakota; all casing will be mudded except production string which will be cemented with 200 sacks.

One joint of 15 1/2" will be cemented with 50 sacks at surface

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
