(Field)	(County or Subdivision)	(State or Territory)	

The elevation of the derrick floor above sea level is 5340 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well completed 1-15-26 at a total depth of 1336 feet with initial production of 225 bbls. of oil, no water per 24 hours. Due to drop in production to no oil per 24 hours, it is proposed to abandon well, to cement Dakota sand series, recover all pipe possible, to fill hole with mud and shale and cement regulation marker in top of hole.

OCC
USGS(2)-JCJ(2)-SFC-file

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
