Dear Mr. Payne:

A letter from this office dated July 23, 1976, advised you that we suspected a casing failure in the subject well.

Your letter of September 30, 1976, indicates that any liquid spill near the wellhead was caused to cease prior to September 1, 1976.

Our field inspector reports the well to have gas present in the soil around the wellhead on October 26, 1976.

Therefore, it is imperative to prevent the waste of natural gas either by repairing the casing leak or by properly plugging the well in the immediate future.

If there are questions, please contact us.

Yours very truly,

A. R. Kendrick
