Re: Carroll Cornell #6
I-12-29N-12W

Gentlemen:

A recent field inspection by personnel from this office reveals that the above referenced well has a casing failure. Gas is migrating to the surface outside of the surface pipe. All vegetation on location is dead and gas is apparently surfacing over a fairly large area.

In order to prevent waste and protect other hydrocarbon bearing and fresh water zones, you are hereby directed to initiate remedial action within (30) thirty days.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Charles Gholson".

Charles Gholson
Deputy Inspector
