DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The well was spudded 4-21-52 and 10-3/4" casing was cemented at 172' with 100 sacks which circulated. Before drilling the plug the casing was pressured up to 500#. No drop in pressure was noted in either operation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
