13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

While attempting a tubing change, Amoco discovered casing leaks at 2680' and 200'. Plans are to run new tubing and a packer to test the producibility of the Mesaverde prior to making the decision to repair the casing. If the Mesaverde is found to produce enough gas to economically justify the casing repair, procedures will be submitted for your approval. If sufficient gas volumes are not realized, the well will be evaluated for recompletion or P&A. Evaluations should be complete and decisions made by 6-1-94.
