

## Development Plan for Surface Use

### GARDNER #2-A

1. Existing Roads: (Exhibit "A")  
Equipment and personnel will utilize U.S. Highway 550, a little less than 12 miles west of the location. The existing exit from the highway will be used.
2. Planned Access Roads: (Exhibit "A")  
This location is near an existing road and about 1000' of new road will need to be built.
3. Location of Existing Wells:  
The proposed well is approximately 3/8 miles north west of the Gardner #2.
4. Location of Flow Lines and Tank Battery:  
The tank battery will be built right on the drilling location near the proposed well. No additional land will be damaged.
5. Location and Source of Water Supply:  
The source water to be used in the drilling operation will be from the irrigation ditch on Highway 550 approximately 12 miles west of the proposed drilling location. The water will be hauled in trucks.
6. Source of Construction Materials:  
All construction materials for this location will be borrowed materials accumulated during the construction of the location site and access road. No additional materials are anticipated at this time.
7. Methods of Handling Waste Disposal:  
The drilling contractor will furnish a metal toilet. Cuttings, metal, wire, etc. that will not burn will either be buried or hauled off the location.
8. Ancillary Facilities:  
There are no planned ancillary facilities at this time.
9. Well Site Layout: (Exhibit "B")  
The small mobile rig will be spotted in the most convenient manner on compact drilling pad. No particular terrain or drainage problem is anticipated.
10. Plans for Restoration of the Surface:  
A minimum of the area will be disturbed to build the location. Upon completion of drilling, the area will be leveled and the pits either fenced or filled as soon as the rig is removed. All areas not needed in producing operations will be seeded with a mixture of five pounds crested wheat grass, five pounds intermediate wheat grass and three pounds nomad alfalfa to each acre. The planting to be done when conditions are favorable.
11. Other Information:  
The location is on a ridge atop the mesa in level to broken terrain. The sandy clayey soil contains some sandstone outcroppings. The vegetation in this area consists of: pinon, juniper, Gambels oak, mountain mahogany, sage brush, antelope bitterbrush, prickly pear cactus and yucca.
12. Lessee's or Operator's Representative:

Delvin Echard  
3605 North Dustin Street  
Farmington, N.M. 87401  
Mobile Phone (505) 325-1549  
Home Phone (505) 325-0598

CERTIFICATION

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drill site and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct, and that the work associated with the operations proposed herein will be performed by \_\_\_\_\_ our contractor

\_\_\_\_\_ and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.
