By OCD District 1 at 7:39 am, Aug 17, 2015

Describe Cause of Problem and Remedial Action Taken.\*

Stress/fatigue of an 8" fiberglass suction line off of a tank caused 10 bbls of oil and 100 bbls of produced water to leak onto the ground. A vacuum truck recovered 5 bbls of oil and 100 bbls of produced water and the line was repaired/replaced.

Describe Area Affected and Cleanup Action Taken.\*

The affected area is approximately 50' x 25' on location inside the firewall. Remediation will be completed according to a remediation plan approved by NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
