Zack,

I don't have a problem with it. I have made a note in the system that the RP will remain open until closure. Ensure BLM approval/concurrence.

Thanks,

Kellie Jones

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Kellie & Shelly,

I have one request regarding this remediation before we begin. Sample point 7 is fairly close to the tanks on location and digging this area to 4' bgs is risky. Also that area has high traffic from water and oil hauling trucks. If there is any way we can hold off on that area until this location is no longer in service or P&A that would great. I am not proposing to do nothing about this area but just to wait. Let me know what you guys think. If you could throw me a bone on this that would be wonderful.

Zack Thomas

Zack,

OCD concurs with BLM stipulations.

If you have any questions, please feel free to contact me.
