---

Dear Mr. Burton:

NMOCD approves of the delineation completed for 1RP-4773. Due to the large discrepancy between field chloride and laboratory analyses, laboratory analyses (BTEX, TPH, and chlorides) of confirmation bottom and sidewall samples are required for each of the 3 proposed excavated areas. Please remember to use Method 8015 extended (GRO, DRO, and MRO) for TPH. Provide a scaled map with 1) the locations of the confirmation samples at <=50 ft. intervals, and 2) each excavation area marked.

Please confirm. Like approval from NMSLO is required.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia,

I have made the changes and corrected the typos. I set up the Adobe library so I can share the link. please let me know if this works. If not I will try again.

Thank you.
