image002.png

Mr. Brunson:

NMOCD approves of the delineation completed and proposed remediation for 1RP-4567 with these conditions:

1. Confirmation bottom and sidewall samples at no greater than 50 ft. apart. Establish at least one sample location between the border of SP1/SP2 & SP3/SP4.
2. Include an appropriately scaled map with confirmation sample locations marked with GPS coordinates in the remediation report.
3. Photo documentation of remedial activities.

Please confirm or inform for clarification.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: RE: Lovington Paddock Unit - Delineation Workplan

Olivia,

BBC conducted additional delineation at the Chevron Lovington Paddock Unit release site on January 15, 2018 as per your instructions below. I have attached the Delineation Workplan that has been updated with the additional deeper sampling data.

Chevron looks forward to receiving the NMOCD's approval of this plan, so the release site can be scheduled to be remediated.

Thanks, Cliff

Subject: RE: Lovington Paddock Unit - Delineation Workplan

Dear Ms. DeLeon:

Due to the depth to groundwater and that there are numerous NMOSE water wells within 1000 ft. of the release area, delineation is not completed for 1RP-4567. Permissible chloride levels must be obtained and maintained for 10 ft. further in depth. Permissible chloride levels are 600 mg/kg.

Thanks,

Olivia Yu
