Subject: RE: 1RP-4312 - Final Closure Approval
Date: Friday, September 22, 2017 12:25:00 PM

Mr. Larson:

Please address these concerns regarding the closure report for 1RP-4312:

1. There are discrepancies among the GPS coordinates written on page 1, the figures, and initial C-141.
2. Please provide an scaled map, table, or short summary indicating the various areas with different depths of excavation.
3. Has the entire excavated area been backfilled?

Thanks,
Olivia

Hello Olivia,
I following up on the information requested for the above captioned project to see if you've reviewed and if we can expect closure approval. Please contact me if you have questions.
Mark

Olivia,
Sorry for the delay in getting this to you. Please find attached email from Tomas plus a remediation summary dated December 15, 2015. Please contact me if you have questions.
Respectfully,

Mark J. Larson, P.G.

Olivia/Tomas,

On January 12, 2017, the email below and link were submitted to the New Mexico Oil Conservation Division (OCD) on behalf of Targa Midstream Services, LLC (Targa). The report documents remediation of the Townsend 16" pipeline release and requested approval to backfill the excavation. No response was received from OCD. In February 2017, the landowner, Dan Field, approved Targa for backfilling the excavation. Backfilling with clean soil (caliche) was completed on February 15, 2017. The attached letter with photo documentation and final C-141 is being submitted to the OCD to request final closure approval of remediation permit number 1RP-4312. It is Targa's understanding based on our last correspondence with Mr. Oberling and Ms. Lynch (prior to her departure) that this information may be needed for formal closure. Please contact Christina Higginbotham with Targa at (713) 584-1396 or me if you have questions.

Respectfully,

Mark J. Larson, P.G.
