December 20, 2017

Hello All,

What Ashley has indicated below is correct and confirmed. Adding only that the OCD understands that no modification of the containments proper will take place, other than perhaps piping relative to new recycling facility/process. Please place new facility as close as possible to original design plans so that we have no siting issues. If possible, please inform OCD by email of when construction of new facility may begin, and if possible, a "kick-off" date for rolling over to new system in case we may have opportunity to attend. Please understand that new plans from as-built will be uploaded to OCD system electronic documentation. We appreciate your efforts and communication.

Sincerely,

Bradford Billings  
EMNRD/OCD  
Santa Fe.

**Subject:** Chevron USA Inc. - 1RF-11 - Recycle Facility Swap Out

Brad,

Thank you for your time this morning. To summarize our discussion, Chevron USA Inc. will be replacing the current recycling facility (1RF-11) with a new facility utilizing a different treatment strategy based on learnings during the approximate eight months of operational experience since initial startup. The new facility will be sited within 100 feet of the current facility. The new facility will be started up simultaneously with the shutdown and subsequent decommissioning of the current facility.

**Please confirm that Chevron USA Inc. does not need to re-register/amend the C-147 for the 1RF-11 recycle facility as a result of the facility replacement.** I will ensure the as-built drawings and new GPS coordinates are provided to you as per your request.

Feel free to give me a call if you have any questions or need additional information.

Thanks,

*Ashley Akin*
