---

Ms. Gonzales:

Notes:

- Although the permissible levels of BTEX, TPH, and chlorides did not change, there are several USGS wells in the vicinity with more recent data than NMOSE.
- Figure 4 still have incorrectly annotated information.

NMOCD will consider delineation complete for 1RP-4688. The proposed remediation plan is approved with these clarifications:

- T- 1 at 4 ft. bgs still exceed permissible chloride levels. Excavation must proceed to 5 ft. bgs or properly key in a minimal 20 mil liner at 4 ft. bgs. If not lined, laboratory analyses of bottom confirmation samples for the area represented by T-1/BH-1 must demonstrate  $\leq 600$  mg/kg.
- At 2 ft. bgs, chloride concentrations at T-2 is still above permissible levels. Proposed excavation of 1-2 ft. bgs may not be sufficient. Laboratory analyses of bottom confirmation samples for the area represented by T-2/BH-2 must demonstrate  $\leq 600$  mg/kg.
- One confirmation bottom/sidewall sample must be located at the border between T-1 and T-2 area.
- Sidewall confirmation samples are required, including one on the eastern border closest to East trench.
- Demarcate confirmation sample locations on an appropriately scaled map with GPS coordinates.
- Photo documentation of remedial activities.

Thanks,  
Olivia

Ms. Yu,

**My apologies, the borehole locations on the figures were incorrect. I have attached a revised work plan showing the correct borehole locations. Additionally, photo documentation of the liner and soil boring logs are included.**

Let me know if you have any other questions or concerns.

Thank you,

**Clair Gonzales**

**Subject:** RE: COG Music Master 27 Federal #3H Work Plan Approval Request (1RP-4688)

Ms. Gonzales:

Please address these concerns regarding the delineation report for 1RP-4688:

- Verify that the test trenches are associated with the correct soil bores. As presented, the proposed remediation plan indicated on Figure 1 does not match the data in Table 1.
- Was the lined facility assessed for liner integrity and cleaned? Photo documentation is requested for completed corrective actions.
- Submit soil bog logs with the subsequent report.

Please note the associated API well on pg.1 is incorrect.

Thanks,  
Olivia
