Mr. Lowry:

NMOCD grants closure to all remediated areas under 1RP-4813. However, due to the elevated TPH levels remaining in the section identified in the risk-based closure report, full closure of 1RP-4813 will be deferred until site retrofit or time of abandonment to address the remaining impacted area.

Like approval from NMSLO required.

Thanks,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
