Dear Mr. Richardson:

Notes:

- There is a USGS well, approximately 0.4 miles NE of the release location, indicating depth to groundwater around 71 ft. bgs in 1976.
- Monument Draw is West of the release location.
- Please be advised that refusal is not an acceptable rationale for incompleteness of vertical delineation.
- Remember to include the MRO fraction in laboratory analyses of TPH using EPA Method 8015.
- Permissible chloride level for delineation and remediation is 600 mg/kg.

NMOCD approves of the proposed soil bore locations to complete release characterization for 1RP-4961.

Thanks,
Olivia

NMOCD Incident No. 1RP-4961

Ms. Yu,

On behalf of our client, RAM Energy Resources, please find attached the Release Characterization Work Plan for RAM's West Dollarhide Queen Sand Unit Well #99 Flowline Release Site. Please be advised that Enviro Clean Cardinal, LLC (ECC) has hired Mr. Jeff Kindley in our Midland Office and Jeff will be managing much of the work assessment at this site with my oversight. If you have any questions regarding this work plan or site, please do not hesitate to contact Mr. Darrell Pennington at RAM in Tulsa at 918-947-6304, or myself at 918-794-7828. Jeff Kindley can be reached in our ECC Midland office at 432-301-0209. Thanks.

Buddy Richardson

George H. (Buddy) Richardson, P.G.
