BLM accepts your closure request.

NOTE: LPC Timing Stipulations are in effect - from March 1st through June 15th. Please plan remedial activities accordingly. Check for African Rue...treat (before it gets out of control).

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. **In such an event a site does not achieve successful restoration, or future issues with contaminants are encountered, the operator will be asked to address these issues until they are fully mitigated and the location is successfully reclaimed.** In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Dear Mr. Thomas:

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-3771** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from BLM and NMSLO required.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good morning Mr. Thomas:

While the activities conducted for 1RP-3771 are not per usual for remediation, NMOCD will agree that sufficient information and data have been provided to close 1RP-3771, please submit a current final C-141 to all corresponding agencies.

Thanks,

Olivia

Mr. Weyant:

NMOCD would appreciate if information related to 1RP-3771 was provided in an organized manner. In addition to referencing 1RP-3771 on all documents, aggregation of tables, figures, laboratory reports, and written communications in chronological order would facilitate review.

Nonetheless, NMOCD would proceed to move 1RP-3771 towards closure with one condition. Please submit a revised report for the June 2016 sampling event. There are discrepancies in sample dates and sample ID. Figure 2 needs to demonstrate C1-C10 sample locations.

Thanks,

Olivia

Subject: Red Hills West

Morning,

Anadarko and Delaware Basin Midstream have recently installed a high pressure gas gathering equipment over the soil bore location of SB#3. Also has NMOCD had time to review Mewbourne's NMOCD Approved (conditional) closure for 1RP-3771 (Nov 10, 2015).

Thank you for you time.
