Subject: RE: reviewed C-141 for Transwestern pipeline strike; April 24, 2018
Date: Thursday, May 3, 2018 11:06:00 AM

Dear Mr. Campbell:

Thank you for the photo documentation.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-5031** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from BLM required.

Thanks,
Olivia

Subject: reviewed C-141 for Transwestern pipeline strike; April 24, 2018

Dear Mr. Campbell:

The 1RP for this incident is

5031	4/27/2018	A	ETC (Energy Transfer) Field Services	Transwestern pipeline ROW		25S-34E- 30K	4/24/2018
-------------	-----------	---	-----------------------------------------	------------------------------	--	-----------------	-----------

NMOCD will accept the C-141 as initial only. Please submit photo documentation of the area around the damaged pipeline to verify that the soil was not impacted due to the major release of natural gas.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
