Subject: RE: proposed additional monitoring wells for Chevron NM E State NCT : 1RP-4239
Date: Thursday, July 26, 2018 8:18:15 AM

July 26, 2018

Hello All,

OCD Santa Fe, is also in agreement with work plan for installation/sampling of the new monitor wells as indicated in the most recent work plan. Ergo, we can remove the pending status. Thank you all for your efforts.

Sincerely,

Bradford Billings
Hydrologist

EMNRD/OCD
Santa Fe

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: proposed additional monitoring wells for Chevron NM E State NCT : 1RP-4239

Dear Messrs. Foord and Michelson:

NMOCD approves of the release characterization/delineation completed thus far for 1RP-4239. The proposed locations and conditions of the additional groundwater monitoring wells are also approved pending NMOCD Hydrologist agreement. Mr. Billings may have concerns or stipulations.

NMSLO concurrence required.

Please note that soil temperatures for samples, submitted on November 17, 2017, were above standard sampling protocols.

Thanks,

Olivia Yu
Environmental Specialist
