Good morning Mr. Ferguson:

Although the depth to groundwater assessment did not change, please remember to check USGS database.

NMOCD approves of the delineation and remediation completed for 1RP-5035. Backfill approval is granted. In the closure report, please include a scaled map with the various depths of excavation demarcated and annotated. Unless informed otherwise, the depth of excavation for the areas represented by DS-1 to DS-3 is 1 ft. bgs. Confirmation bottom/delineation samples were taken at the depths indicated on page 3. Provide dated photo documentation of remedial activities.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Ms Olivia Yu & Ms Christina Hernandez,

Attached is a letter requesting approval to backfill the excavated area within the containment at the Plains-COG Fascinator Fee Com #2H LACT Unit Release project (NMOCD #1RP-5035) located in Lea County, NM.

Attached to the letter is a Topographic Map depicting the Site's location, a Detailed Site & Analytical Data Map (depicting sample locations/depths/soil analytical results), an analytical data table, and initial Form C-141.

Upon your approval, the excavated area will be backfilled with clean crushed caliche material and restored following the requirements by Plains.

Your timely response is appreciated and please contact me if you have questions or comments.

Best Regards,

John M. Fergerson, PG
