Subject: RE: OXY - MLMU #247 - Remediation Plan
Date: Wednesday, March 1, 2017 1:54:00 PM

Dear Mr. Brunson:

The delineation report for 1RP-4242 is approved with these conditions. Please confirm.

1. SP1 can be excavated to 1.5 ft. bgs. Please obtain bottom confirmation samples at the base of SP1 area, where the offshoot meets SP2 and SP3 region.
2. Excavate area of SP2 and SP3 to 3 ft. bgs. Chlorides at SP3 fluctuates and a current search of depth to groundwater on OSE's database indicate the water table at 90 ft. bgs. Obtain bottom confirmation samples.
3. Based on chloride levels for SP4, complete horizontal delineation is required. At a minimum, two other soil sample locations are needed: 1 West and 1 East of SP4.
4. Is the liner proposed only for the SP4 area?

Thanks,

Olivia Yu
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: OXY - MLMU #247 - Remediation Plan

Kristen,

This e-mail is to confirm our discussion concerning the remediation plan for the OXY MLMU #247 release. I have attached the information packet that we used in our discussion on 2/25/17 with a cover page describing the remediation plan that we agreed upon.

If you would please reply back via e-mail with your concurrence on this plan, it would be greatly appreciated.

Thanks, Cliff
