Good morning,

We will be sampling the excavated area today. We will also be installing the liner today and starting to backfill the site. Let me know if you have any questions.

Thanks,

Mr. McMinn:

NMOCD approves the proposed remediation plan for 1RP-4437. Please see the attachment for your records.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I  
[Olivia.yu@state.nm.us](mailto:Olivia.yu@state.nm.us)  
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia

Thank you for taking the time out of your busy schedule to meet with me on Friday. We will submit a CAP to excavate the impacted areas to a depth of 4 feet below ground surface and install a liner that is at least 20 mils. Hope you had a nice weekend.

Thanks,

Olivia

As we discussed yesterday on the phone, below is the correspondence that I had with Kristen in September regarding her request to delineate to 250 ppm. I'll be in Eddy county sampling a site on Friday, would you be available at your office in the afternoon to discuss options going forward for closing this site?

Thanks,

Tim McMinn

Thanks Kristen,

The analytical is at the back of the attached report. We will proceed with delineation to 250 per your requirement.

**Subject:** RE: SOGO III SFPRR Lease Fire (Event 4437)

Good Morning,

I would like to see the analytical data for this site, if you could send them to me. NMOCD requires delineation to 250 Cl-, prior to getting a work plan. Yes you will need to do further delineation to achieve our requirement.

Thank You,

*Kristen D. Lynch*  
*Environmental Specialist, District 1*  
*Oil Conservation Division, EMNRD*  
*(575) 393-6161 ext. 111*  
*575-370-3180 (emergency-cell)*

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Kristen,

As discussed this morning for the above project we dug test trenches down to 7-8 feet to try to reach chloride levels of 250 ppm. Utilizing the backhoe, we were unable to reach 250 ppm, however we did have readings between 900-3,000 ppm. For the 'Middle' 8 foot sample, I believe that to be an outlier. If further investigation is needed in that area, or other areas please let me know. I've attached the data that we have as of now and our proposal for the cleanup for your review and approval. If you have any questions, let me know.

Thanks,

Tim McMinn
