Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Changed approved drilling plan for setting depth of 4 1/2" liner f/ 8850' to 9153' because:

We wanted to put the top of our 4 1/2" liner in the lateral portion of our curve, so in the future when production declined we could move our rod pump as far down in the curve as we could. The 7" casing provides more room for the 2 7/8" production tubing. We were only able to get our liner partially through the curve because hole condition would not allow us to push liner any further, so our setting depth was 9153' instead of 8850' MD.

Verification of 13,924' TMD:

Total measured depth was verified with strap of drill pipe and MWD.
