08/26/11 – MIRU kill truck & recording chart. Pressure casing to 540 psig, held for 30 mins. Chart attached.
 RDMO kill truck.

It is requested that the TA'd status of this well be extended. The well is a twin to the J. M. Denton #6 which currently produces from the Devonian Zone. Legacy Reserves Operating LP would like to keep this wellbore to utilize as a replacement well in the event the #6 wellbore becomes incapable of use. Legacy would also like to keep this well in TA'd status while it observes the results of the J M Denton #2 reactivation in the Wolfcamp zone. The #2 well was just recently reactivated and more time is needed to obtain results before making a decision on reactivating other wells in the Wolfcamp zone on Legacy's J M Denton lease.

Spud Date: Rig Release Date: This Approval of Temporary Abandonment Expires 8-26-2012

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
