13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

According to guidelines in the APD dated 6/15/06, the following is the proposed reclamation plan for the reserve pit on the subject well:

An exception is requested to the Lesser Praire Chicken Stipulation to allow reclamation of this reserve pit so long as activity begins only after 9 AM.

- The dried cuttings in the reserve pit will be buried a minimum depth of three (3) feet below ground level.
- The existing impervious, reinforced 12 mil liner will be used to encapsulate the reserve pit cuttings.
- The reserve pit will be covered with three (3) minimum cap of clean soil or like material that is capable of supporting native plant life.
- Should the cuttings in the reserve pit not meet three (3) feet below ground level depth, the excess contents will be removed and encapsulated on site in a pit lined with impervious, reinforced 12 mil liner with three (3) feet minimum cap of clean soil.
- After approval is received, a three day notice before reclamation starts will be given to your designated representative.

14. I hereby certify that the foregoing is true and correct.
