The well, currently a downhole commingled producer in the Hobbs;Tubb (Gas) and Hobbs;Drinkard pools, will be plugged back to the San Andres and a small pay zone will be opened. A brief production test will be run, followed by an injection test. The perfs will be squeezed and the same test will be repeated +/- 160' higher in the wellbore. Once testing in the San Andres is completed, all perfs will be squeezed and the well will be returned to production as a downhole commingled Tubb/Drinkard well.
