CASING/CEMENT JOB ☐OTHER: ☐OTHER: ☐

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

The original APD for this well was approved by the Division on 12/2/2008. Approval was granted to drill the well 450' FNL & 990' FWL (Unit D) of Section 36, T-21 South, R-37 East, to test the Blinebry Oil & Gas (Oil), Tubb Oil & Gas (Oil) and Drinkard Pools.

Apache seeks approval to amend the well location and to directionally drill the well from a surface location 1331' FNL & 1530' FWL (Unit F) of Section 36 to an unorthodox bottomhole location 1331' FNL & 1330' FWL (Unit F) of Section 36 to test the Blinebry Oil & Gas (6660), Tubb Oil & Gas (60240) and Drinkard (19190) Pools.

NSL-6144-A (2/10/2010) granted approval of the unorthodox well location. In addition, NSP-1940 (2/1/2010) approved four 40-acre non-standard gas proration units in the Blinebry and Tubb Oil & Gas Pools comprising all quarter-quarter sections within the NW/4 of Section 36. However, Apache proposes to permit the Blinebry & Tubb as oil completions at this time.

The casing/cementing program for the well will be slightly altered as follows:

12.25" Hole 8.625" 24# Casing set at 1,300' and cemented w/650 Sx. Circulate to Surface

7.875" Hole 5.5" 17# Casing set at 6,800' and cemented w/1000 Sx. Circulate to Surface
