Dear Operator:

A recent review of our records noted the following items that failed to meet standards of the New Mexico Oil Conservation Division.

The Redhawk 32 State No. 1 and the Lawton State No. 2 were plugged out in January of 2008. Rule 19.15.25.10 D stipulates that clean up and restoration of the location shall be completed within one year of the well being plugged.

The T/A status of New Mexico B State No. 1 has expired.

As a result of these findings, please submit the appropriate C103, specific to the plugged wells, to this office so that an inspection can be conducted to verify compliance.

In addition, a C-103 should be submitted before September 1, 2010, detailing your intent to T/A, Plug and Abandon, or return the New Mexico B State No.1 to production.

Any questions or request for extensions can be directed to Mr. E L Gonzales, OCD District-1 Staff Manager, by calling 575-393-6161 ext. 114.

Respectfully,

E L Gonzales, Staff Manager
