13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This well produces 4 mcfpd. At the current price of \$4.50/mcf, the total monthly revenue would be \$547.

Yates has a gathering line that is 4066 ft to the north and would cost an estimated \$33,000 to build a connection. (6 year payout) Yates has been approached and due to the low volume and low gas price, is not interested at this time in connecting this well to their gathering line.

DCP has a low pressure line that is 4.3 miles to the north west and would cost an estimated \$353,000 to build a pipeline (including road bore) and set a meter and meter run. (64.5 year payout)

Neither of these options are economical. Permission is requested to vent for 1 year or through August 31, 2011.

*Venting has been occurring for 27 years.
DCP has a pipeline in this section with
max pressure of 35 psi.*

Permission to vent - DENIED
