13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Operations began on 10/01/10. We went in the hole put acid to the stuck tubing anchor then waited overnite. We then were able to pull the full string of tubing with no problems. We went in w/ a casing scraper and cleaned to the casing out. A bailer was then used to clean out the bottom hole of any trash. The hole in the casing was the isolated and squeezed off. We ran a compensated neutron log to confirm the perms were open. The tubing and rods were run back in the hole and the well was put back on production on 10/28/10.

For a more detailed account of operations please refer to the daily operations reports submitted. - not submitted

Rejected - casing repairs require prior approval pursuant to 43 CFR 3162.3-2, a. Inadequate description of work performed. No return call from operator.

Wesley M. Drayman
