Re: Federal D (SWD) #2-J, Sec 31, T9S, R36E

Gentlemen:

The repairs and pressure test on the above referenced salt water disposal well were witnessed by an Oil Conservation Division representative.

The repairs are sufficient that you may resume using the well for disposal as approved by Jerry Sexton, District I Supervisor.

In order to insure that a problem does not develop and remain undetected, we request that you set an open top barrel filled with water and attach it to the production casing/tubing annulus valve. If a hole comes in the tubing, the water in the barrel would then be taken into the well on a vacuum. We request that you monitor the level of water in the barrel at least once a week.

If any change should occur, or other problem arise, we request that you notify this office at (505) 393-6161.

Very truly yours

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
