Re: Federal G (SWD) #1-G, Sec 31, T9S, R36E

Gentlemen:

The information regarding oil recovered by backflowing the above referenced salt water disposal well, as stated in your letter dated August 8, 1991, indicates some well bore problems.

Since the well is producing oil, testing the casing or running some log to determine where the oil is coming from, should be done if producing the well is continued or before injection is started.

After studying your options, please let us know the future plans for the well.

Very truly yours
