The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Great Western Drilling Company has permission to convert the above well to salt water disposal as per letter of November 26, 1962, except that the interval 7400-7600 is to have the cement plug. This was agreed by telephone with Mr. Carl Traueck December 18, 1962. Mr. Gene Stanley will be notified to witness setting of the plug as other work is required.

According to records sent Great Western Drilling Company by Greathouse, Pierce and Davis, a cement plug of 30 sacks was set at 9730'. There was also a cement plug of 30 sacks set @7800'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
