Dug out cellars to expose outlets of bradenheads from the first string of pipe cemented in well and all subsequent heads to and including the tubing head. Built risers from connection on each well head with second valve on top of surface, to be able to check for pressure. Work performed has been inspected by Oil Conservation Representative, A. A. (Tony) Plattsmir

I, I hereby certify that the information above is true and complete to the best of my knowledge and belief.
