RE: SWD 35, Southlane Salt Water
Disposal

Gentlemen:

Enclosed you will find a C-104 requesting permission to haul 100 bbls of oil off the above referenced well. I am having to request this as some hauler has dumped some loads in our well without permission; these loads contained some oil. I have no way of knowing where this came from. The gates on this well are locked and so are the tank valves but they apparently went over the fence and over the top of the tank.

Please feel free to contact me if there are any questions or problems.

Sincerely,

Drilling & Production Engineer
