13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Nadel and Gussman Permian requests permission to vent gas in the estimated amount of 15 MCF per day for a period of 5 years. Line pressure is high and the unit cannot be kept running. Installation of compression is uneconomic. It would cost approximately \$1500 to install a rented compressor, and incremental operating costs would be approximately \$900/Mo.

Total monthly income would be \$677*, which would not cover even the incremental expenses. BTU content is only 523/SCF.

See attached economics and gas analysis.
