Re: L. Wrinkle #1

Dear Ms. Mills:

On March 9, 1992, an exception to flare for the L. Wrinkle #1 UL-D Sec. 13-T15S-R31E was given until March of 1995. The exception was approved by Mr. Sexton, the previous New Mexico Oil Conservation (NMOCD) District Supervisor, based on Saba's response that "construction of a gas connection was not economically viable due to low gas price and low and declining gas production". Another letter was written to Saba on April 4, 1995 requesting a submission of a C-129 exception and it was returned with the hand written note "this lease does not produce gas, therefore the exception is no longer needed", signed by Tracy Mills, Engineering Asst. This exception was not approved by the previous District Supervisor. Please fill out the enclosed C-129 stating the reasons why this lease should have an exception to the NMOCD rule on the flaring of casinghead gas. Also, please provide this office a diagram of the facilities that the well is produced into and a copy of the latest gas test and any meter calibration certificates if available. Please provide the information requested by April 22, 1998.

Sincerely,

Chris Williams
District 1 Supervisor
