17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well is now at a depth of 350'. They have had trouble drilling because of the water sands from approx 60' on down to this depth. We ran 140' of 13 3/8" casing on May 11, 1974 so that they could drill through it as they were not making much progress. This pipe will be pulled back out later. Planned to run and hang 350' of 9 5/8" csg. on June 11, 1974 - hole had filled up - now cleaning it out and will run this 9 5/8". If this puts us through the water zone we will cement according to specifications - if not will continue to drill until through the water and set casing at that depth and cement. Plan to have hole cleaned out and run casing on June 19, 1974.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
