Re: Forms on State #1
Sec. 26-16-33

Attention: Mr. R. F. Montgomery, Geologist

Gentlemen:

We have checked again the Form C-103 that was filed on captioned well. In addition, have read your letter concerning form.

We drilled the well, cored it, and plugged it. The casing is shut off at the top with cement and a piece of 4½" drill pipe, and at the bottom with cement as indicated in the plugging report.

We do not understand just exactly what you want supplementing our original C-103 that we filed. Would you please tell us specifically what you need and we will comply.

Very truly yours,

FRONTIER DRILLING & PRODUCTION CO.

J. M. Reaves, Vice President
