

DST #5 10-8-78
Depth: 8170' - 8230'

	Initial Hydrostatic Pressure	3935
10 min.	Initial Flow Pressure	83
60 min.	Initial Shut-in Pressure	502
120 min.	Final Flow Pressure	111
240 min.	Final Shut-in Pressure	1954
	Final Hydrostatic Pressure	3910

Recovered 100' of heavily oil cut mud.

Sampler contained 1200 cc's of heavily oil cut mud and water at 50 psi.

DST #6 10-9-78
Depth: 8230' - 8270'

	Initial Hydrostatic Pressure	3987
10 min.	Initial Flow Pressure	83
60 min.	Initial Shut-in Pressure	2980
90 min.	Final Flow Pressure	223
180 min.	Final Shut-in Pressure	2905
	Final Hydrostatic Pressure	3974

Recovered 180' of oil cut mud and 304' salt water.

Sampler recovered 1000 cc's of water and drilling mud with very light skim of oil at 110 psi.
