Armer Oil Company proposes to drill its Union Texas State #1 well to test the Seven Rivers and Queen formations.

A Cactus Drilling Company rotary rig will be utilized to drill the well to total depth utilizing a native mud system to the Yates formation and a salt water mud system from N. to total depth. Rig will be equipped with blowout preventor during drilling operations and all casing run in well will be pressure tested to 1000 psi before drilling plugs or perforating.

Productive zones in the Seven Rivers and/or Queen will be perforated and fracture treated for production.
