

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	<b>X</b>	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

# THEORY OF THE EARTH

CHAPTER I

## THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and is the only one of which we have direct knowledge. It is a sphere, and is composed of a solid inner core, a liquid outer core, and a solid crust. The crust is the part of the Earth which we live on, and is composed of rocks and minerals. The crust is divided into continents and oceans, and is further divided into smaller units called countries and states.

## THE EARTH'S HISTORY

The history of the Earth is a long and complex one, and is divided into several periods. The first period is the Pre-Cambrian period, which is the longest and least known. It is followed by the Cambrian period, which is the first period in which life is known to have existed. The Cambrian period is followed by the Silurian, Devonian, Carboniferous, Permian, Triassic, Jurassic, Cretaceous, Tertiary, and Quaternary periods.

The Pre-Cambrian period is the longest and least known. It is followed by the Cambrian period, which is the first period in which life is known to have existed. The Cambrian period is followed by the Silurian, Devonian, Carboniferous, Permian, Triassic, Jurassic, Cretaceous, Tertiary, and Quaternary periods. The Quaternary period is the most recent, and is the period in which we live.

## THE EARTH'S HISTORY (Continued)

The Pre-Cambrian period

The Cambrian period

The Silurian period

The Devonian period

The Carboniferous period is the first period in which land plants and animals are known to have existed. It is followed by the Permian period, which is the first period in which dinosaurs are known to have existed. The Permian period is followed by the Triassic, Jurassic, and Cretaceous periods.

The Tertiary period is the first period in which man is known to have existed. It is followed by the Quaternary period, which is the most recent, and is the period in which we live.

The Quaternary period is the most recent, and is the period in which we live.

The Quaternary period is the most recent, and is the period in which we live.

The Quaternary period is the most recent, and is the period in which we live.
