MISCELLANEOUS REPORTS ON WELLS

RECEIVED  
JUN 8 1946  
OIL CONSERVATION COMMISSION

DUPLICATE

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within 10 days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL	X	REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

OIL CONSERVATION COMMISSION,  
SANTA FE, NEW MEXICO.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

Fred Turner Jr.,  
Company or Operator

State "D"  
Lease

Well No. 1 in the

SE 1/4 NW 1/4

of Sec. 5, T. 17-S

, R. 36-E, N. M. P. M.,

West Lovington

Field,

Lea

County.

The dates of this work were as follows: May 20th 1946

Notice of intention to do the work was (~~was~~) submitted on Form C-102 on May 19th 1946 and approval of the proposed plan was (~~was~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

On May 20th 1946 this well was washed with 500 gallons of mud acid and then given a 4000 gallon treatment. It required 2500# pressure to break the formation before it would take any acid. Permeation took the acid at 2450# showing that the section was very tight. Before acidizing well swabbed at the rate of 10 barrels per day. Well would not flow after acid and was placed on pump.
