Mabelle Miller

December 4, 1962

Well No. 1 is located 1980 ft. from XX line and 495 ft. from E line of sec. 22  
NE 1/4 SE 1/4 22 19S 33E 100M  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Tonto Lea   
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3634 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In keeping with your "Certified Mail Request" of October 10, 1962 pertaining to this lease and rework operations applicable under Title 43 CFR 192.121.

Immediate plans are being made to set Permanent D.C. Bridge Plug and Squeeze Tool at 3520' in 5-1/2" Casing and Squeeze Cement exhausted producing zone from 3560 to total depth of 3628 ft. which has gone to 100% water based on producing some 400 bbls per day.

After completing the above, the interval from approximately 3480 to 3490 will be perforated in top of Seven Rivers in an attempt to complete either a gas or oil well. This interval made approximately 30 MHOFFD when drilled and tested in 1952.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
