1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. The investigator will then gather information about the problem and the people involved. This information will be used to develop a plan of action.

2. The second step is the development of a plan of action. This plan will outline the steps that will be taken to solve the problem. The plan will also identify the people who will be responsible for each step.

3. The third step is the implementation of the plan. This is where the investigator will put the plan into action. The investigator will monitor the progress of the investigation and make adjustments as needed.

4. The fourth step is the evaluation of the results. This is where the investigator will determine if the problem has been solved. If the problem has not been solved, the investigator will go back to the first step and start over.

5. The fifth step is the documentation of the results. This is where the investigator will write up a report of the investigation. The report will include all the information that was gathered and the steps that were taken.

6. The sixth step is the dissemination of the results. This is where the investigator will share the results of the investigation with the people who are involved in the problem. This will help them to understand the problem and the steps that were taken to solve it.

7. The seventh step is the follow-up. This is where the investigator will check back on the problem to make sure that it has not come back. If the problem has come back, the investigator will go back to the first step and start over.

8. The eighth step is the conclusion. This is where the investigator will write up a final report of the investigation. The report will include all the information that was gathered and the steps that were taken.

9. The ninth step is the dissemination of the results. This is where the investigator will share the results of the investigation with the people who are involved in the problem. This will help them to understand the problem and the steps that were taken to solve it.

10. The tenth step is the follow-up. This is where the investigator will check back on the problem to make sure that it has not come back. If the problem has come back, the investigator will go back to the first step and start over.

1. The first group of people who are interested in the study of the history of the United States are the people who are interested in the history of the United States.
