1. The first step in the process of identifying and classifying information is to determine the source of the information. This is done by examining the document for any identifying marks, such as a date, a signature, or a stamp. Once the source has been identified, the next step is to determine the nature of the information. This is done by examining the content of the document and determining whether it is a report, a letter, or a document of some other type. Once the nature of the information has been determined, the final step is to classify the information. This is done by examining the content of the document and determining whether it is classified as "Secret", "Confidential", or "Unclassified".

Figure 1. The effect of the concentration of the H_2O_2 solution on the amount of the released H_2O from the H_2O_2 -loaded hydrogel. The amount of the released H_2O was measured by the weight difference of the hydrogel before and after the release. The concentration of the H_2O_2 solution was 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 0.9, and 1.0 wt. %.
