Gentlemen:

Attached is Continental Oil Company's application to the Oil Conservation Commission of New Mexico for permission to dual complete and allocate a non-standard proration unit to its Lockhart A-35 No. 1 well which is self explanatory.

This application is submitted to you as offset operators in compliance with Commission Rules and Regulations.

Yours very truly,

W. E. Allen

W. E. Allen

WEA-PGM

BEFORE THE OIL CONSERVATION COMMISSION
OF THE
STATE OF NEW MEXICO

IN THE MATTER OF THE APPLICATION
OF CONTINENTAL OIL COMPANY FOR AN
ORDER GRANTING IT PERMISSION TO DUAL
COMPLETE ITS LOCKHART A-35 No. 1
NW/4 NW/4 SECTION 35, T. 21S, R.
37E, N.M.P.M. LEA COUNTY, NEW
MEXICO

A P P L I C A T I O N

Comes now CONTINENTAL OIL COMPANY, a Delaware Corpora-
tion, hereinafter called "Applicant" and respectfully requests
the Oil Conservation Commission of the State of New Mexico to
issue an order authorizing Applicant to dually complete and allo-
cate a non-standard proration unit to its Lockhart A-35 No. 1
well, located 660 feet from the North line and 660 feet from
the West line of Section 35, T. 21S, R. 37E, N.M.P.M., Lea County,
New Mexico, in the Drinkard Oil Pool and the Blinebry Gas Pool,
and in support thereof would show the following:

The proposed gas unit contains 120 acres consisting
of contiguous quarter quarter sections, N/2 NW/4 and SE/4 NW/4
Section 35-21S-37E, lies wholly within a single governmental
section, and may be reasonably presumed to be productive of gas.

The dual completion of said well in the Drinkard for
oil and the Blinebry for gas is in the interest of conservation
and the protection of correlative rights.

Segregation of the producing intervals will be made
by appropriate packer installation and said well will be equipped
so there can be no comingling of well fluids in producing the
gas through the annulus between the tubing and casing, and the
oil through the tubing. Said well will be equipped in such a
manner that reservoir pressures may be determined separately for
each of the two specified pools and the well head equipment to
be equipped with all necessary connections to permit accurate
measurement of any natural gas, oil, or oil and gas produced from
each separate pool as may be required by the Commission.

Attached to this application is a plat showing the
location of said well and surrounding wells and leaseholds with

the acreage to be assigned the proposed gas unit outlined in red, a plat showing the mechanical condition of said well at present and after the proposed dual completion.

All offset operators have been duly notified by copy of this application.

WHEREFORE, Applicant respectfully requests the Oil Conservation Commission of the State of New Mexico enter its orders authorizing Applicant to dually complete said well and allocate a non-standard proration unit to the well in accordance with the foregoing application and rules and regulations of the Commission.

in and for Lea County, New Mexico.

My Commission Expires _____

The map displays the Ohio oil and gas fields, showing various oil and gas wells, pipelines, and land ownership. The map is divided into sections by dashed lines, with some sections labeled with numbers like 25, 26, 27, 34, 35, 36. Key locations and owners mentioned include: A.J. Turner, Continental, (A.M. Lockhart), S.J. Sankers, Greenbrier Oil Co., Harper & Turner, Culf, Humble, Simlar, J.R. Cone, E.C. Hill, Magnolia, EUNICE, R. Marshall, A.A. Hardison, Cities Service, Mark Owens, Parker Drilling Co., and Mid Cont. Pet. The map also shows various pipelines like the Ohio Pipeline and the Ohio Gas Pipeline. The map is a technical drawing with many small details and labels.
