

NEW MEXICO OIL CONSERVATION COMMISSION  
Santa Fe, New Mexico

**MISCELLANEOUS REPORTS ON WELLS**

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT TO THE BOARD OF DIRECTORS  
ON THE PROGRESS OF THE WORK DURING THE YEAR 1900

GENERAL STATEMENT OF THE WORK DURING THE YEAR 1900

The work of the Board of Directors during the year 1900 has been characterized by a steady and consistent progress in all the lines of activity. The financial statement shows a net income of \$1,000,000, which is a record for the company. This result has been achieved by the efficient management of the company's affairs and the successful execution of the various projects which have been undertaken.

The first of the projects which have been undertaken during the year 1900 is the construction of the new building for the company's headquarters. This building is now under construction and is expected to be completed by the end of the year. It will be a large and modern building, which will provide ample space for the company's various departments and will also be a credit to the city in which it is located.

The second of the projects which have been undertaken during the year 1900 is the purchase of the new machinery for the company's manufacturing plant. This machinery is now being delivered and is expected to be installed by the end of the year. It will be a large and modern piece of machinery, which will enable the company to produce its goods more efficiently and at a lower cost.

The third of the projects which have been undertaken during the year 1900 is the purchase of the new land for the company's expansion. This land is now being surveyed and is expected to be purchased by the end of the year. It will be a large and fertile piece of land, which will enable the company to expand its operations and to produce more goods.

The fourth of the projects which have been undertaken during the year 1900 is the purchase of the new stock for the company's expansion. This stock is now being purchased and is expected to be delivered by the end of the year. It will be a large and valuable piece of stock, which will enable the company to expand its operations and to produce more goods.

The fifth of the projects which have been undertaken during the year 1900 is the purchase of the new land for the company's expansion. This land is now being surveyed and is expected to be purchased by the end of the year. It will be a large and fertile piece of land, which will enable the company to expand its operations and to produce more goods.

The sixth of the projects which have been undertaken during the year 1900 is the purchase of the new stock for the company's expansion. This stock is now being purchased and is expected to be delivered by the end of the year. It will be a large and valuable piece of stock, which will enable the company to expand its operations and to produce more goods.

The seventh of the projects which have been undertaken during the year 1900 is the purchase of the new land for the company's expansion. This land is now being surveyed and is expected to be purchased by the end of the year. It will be a large and fertile piece of land, which will enable the company to expand its operations and to produce more goods.

The eighth of the projects which have been undertaken during the year 1900 is the purchase of the new stock for the company's expansion. This stock is now being purchased and is expected to be delivered by the end of the year. It will be a large and valuable piece of stock, which will enable the company to expand its operations and to produce more goods.

The ninth of the projects which have been undertaken during the year 1900 is the purchase of the new land for the company's expansion. This land is now being surveyed and is expected to be purchased by the end of the year. It will be a large and fertile piece of land, which will enable the company to expand its operations and to produce more goods.

The tenth of the projects which have been undertaken during the year 1900 is the purchase of the new stock for the company's expansion. This stock is now being purchased and is expected to be delivered by the end of the year. It will be a large and valuable piece of stock, which will enable the company to expand its operations and to produce more goods.

The eleventh of the projects which have been undertaken during the year 1900 is the purchase of the new land for the company's expansion. This land is now being surveyed and is expected to be purchased by the end of the year. It will be a large and fertile piece of land, which will enable the company to expand its operations and to produce more goods.

The twelfth of the projects which have been undertaken during the year 1900 is the purchase of the new stock for the company's expansion. This stock is now being purchased and is expected to be delivered by the end of the year. It will be a large and valuable piece of stock, which will enable the company to expand its operations and to produce more goods.
