It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "struck back" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

HISTORY OF OIL OR GAS WELL

Figure 1. Schematic diagram of the experimental setup. The setup includes a laser source, a beam splitter, a lens, a sample, and a detector. The laser beam is split into two paths: one path goes through the lens and the sample, and the other path goes through the beam splitter and the detector. The sample is a thin film of the material being studied.
